Old Brush Arbors
recorded by George Jones
written by Darrell Edwards and Gordon Ardis

```
G
I remember them so clearly

Mom and dad loved them so dearly
                                    D7
Old brush arbors by the side of the road
        G
Where I learned about salvation

From the book of Revelation
                    D7          G
And in arbors by the side of the road
    C                             G
Old brush arbors by the side of the road
                                        D7
Where a sinner could lay down his heavy load
       G
It was in those old brush arbors
        C                      G
Troubled souls found peaceful harbor
                   D7          G
Brush arbors by the side of the road

Many times I had departed

From the way of life I started

D7
In them arbors by the side of the road
         G
But each time the devil caught me

I remember what they taught me
                     D7          G
In brush arbors by the side of the road

   C                                G
Old brush arbors by the side of the road

D7
Where the mighty light of God's great mercy flowed
          G
There was praying shouting singing
        C                G
Till the country side was ringing
                   D7          G
Brush arbors by the side of the road

                         D7          G
Old brush arbors by the side of the road
```
