```
D             E               A
 Put on your best dress baby
                              D
And darling fix your hair up right
                 E          A
Cause there's a party honey
                             D
Way down beneath the neon lights
                        E                      D
All day you've been working that hard line
              C#                          F#m | E | D
Now tonight you're gonna have a good time

              E               A
I work five days a week girl
                             D
Loading crates down on the dock
           E                A
I take my hard earned money
                             D
And meet my girl down on the block
                        E               D
And Monday when the foreman calls time
                   C#             F#m
I've already got Friday on my mind

                    Bm
When that whistle blows
                      F#m
Girl, I'm down the street
                 F#                      A
I'm home, I'm out of my work clothes
                              D                  A
When I'm out in the street oh, oh, oh, oh, oh
            E                 A
I walk the way I wanna walk
                              D                  A
When I'm out in the street oh, oh, oh, oh, oh
              E               D
I talk the way I wanna talk
                             A
When I'm out in the street
                            Bm
When I'm out in the street

```
D               E                   A
 When I'm out in the street girl,
                          D
Well, I never feel alone
```

```
              E                  A
When I'm out in the street girl,
                        D
In the crowd I feel at home
              E                    D
The black and whites they cruise by
                              C#                F#m
And they watch us from the corner of their eyes

                      Bm                  F#m
But there ain't no doubt girl, down here
                   F#                              A
We ain't gonna take what they're handing out
                            D                       A
When I'm out in the street oh, oh, oh, oh, oh
            E                 A
I walk the way I wanna walk
                            D                       A
When I'm out in the street oh, oh, oh, oh, oh
            E                 D
I talk the way I wanna talk
                       A                    Bm       D | E
Baby, out in the street I don't feel sad or blue
                                                    D
Baby, out in the street I'll be waiting for you

When the whistle blows
                        F#m
Girl, I'm down the street
                 F#                      A
I'm home, I'm out of my work clothes

I talk the way I wanna talk

                            D                       A
When I'm out in the street oh, oh, oh, oh, oh
                 E                        A
Pretty girls, they're all passing by
                            D                       A
When I'm out in the street oh, oh, oh, oh, oh
                   E                  D
On the corner we give them the eye

                         C#m              Bm      A | E
Baby, out in the street I just feel all right
```
