A God Of Love

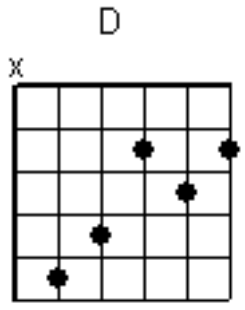

A God of Love

```
   G                  D2                    CG
A God of love is what You are to me
Am7                   G                  D2
A greater friend no one could ever be
   G                  D2                  C    G
In holiness born of Your Spirit's touch
          Am7              G                  D2
Through never-ending love You give so much

                  G                              Em
Who would not love You who would not cherish You
                  C       Am7             D
Who would not serve You all their days
                  G                              Em
Who would not praise You who would not honor You
                  C       D2                     G
Who would not die for You who would not love You
```

A Father's love is what You give to me
A guiding hand a light so I could see
In knowing You I've found my heart's desire
In loving You I've touched Your holy fire
